### FEDERAL GOVERNMENT SHOULD NOT TAKE OVER HEALTHCARE!

By Woodrow Wilcox

In this election year, I have heard many people urge that the federal government take over the nation's health care system. I believe that is a bad idea.

I'm not suggesting that the present system is perfect. I want reform, too. But, I want reform that will bring positive changes. The federal government is involved with healthcare for senior citizens and veterans and those systems are full of problems. I know because for over five years I have helped senior citizens with their billing problems with Medicare and VA health matters.

For over five years, I have written articles about the problems that senior citizens have with Medicare and the VA. Gradually, I am posting those articles so that anyone can read them at [www.woodrowwilcox.com](http://www.woodrowwilcox.com).

In my opinion, the present federal Medicare system causes senior citizens to be swindled out of one billion dollars per year. In my opinion, the present Medicare – VA billing system causes senior citizen veterans to be swindled out of one hundred million dollars per year. If you want to know more about this and check my calculations, visit the website [www.woodrowwilcox.com](http://www.woodrowwilcox.com) and read the Medicare related articles. It is free. There is no charge for this information.
